

The 12 Universal Laws:

1) The Law of Oneness:

This Law explains that everything in this world is connected to everything else. Anything we believe, think, do, or say affects the world and the universe around us.

2) Law of Energy or Vibration:

This Law describes that everything in the Universe vibrates. This law holds true in every aspect of life. Vibration is in the physical world, within our thoughts, feelings, desires, and dreams. Every vibrational frequency has a unique vibration.

3) The Law of Action:

Action brings results, manifesting different results, depending upon our thoughts, dreams, emotions, and words. Therefore, we must engage in actions that support those thoughts, dreams, emotions and words.

4) The Law of Correspondence:

This Law places us in the drivers' seat of our own life. Your outer world will be a direct reflection of your inner world, accepting responsibility for your life. This law takes us out of the victim role making us the sole creator of our own life.

5) Law of Cause and Effect:

This Law states that nothing happens by chance or outside the Universal Laws. For this law we look at every action. This is because every action has an appropriate reaction. This law means we have to take responsibility for every that happens in our lives. Every action has a reaction or consequence and we "reap what we have sown."

6) The Law of Compensation:

This Law is an arm from Cause and Effect being applied to abundance and blessings that come into our lives. Compensation is the visible effects of our deeds; it can show up as gifts, money, friendships, or any other blessing given to us due to our actions.

7) Law of Attraction:

This Law creates things, events, and people that come into our lives, through our thoughts, feelings, words, and actions. All these thoughts and actions are energy that we place out to the world attracting like energies. In other words placing a negative energy out to the world will attract other negative energies and putting out a positive energy will attract other positive energies.

8) Law of Perpetual Transmutation of Energy:

As energy we all have the power to change any condition in our lives. Producing a higher vibration consumes and transforms lower ones. This means we can change the energies in our lives by understanding the Universal Laws and applying their principles that will produce change.

9) Law of Relativity:

Each of us will receive a series of situations to strengthen the energy within us. This law gives us the ability to stay connected to our hearts when proceeding to solve the situations. This law also teaches us that if we compare our problems to other peoples' problems it will place everything into its proper perspective. No matter how bad we perceive our situation, there is always someone who is in a more difficult position, making it all relative.

10) Law of Polarity:

This Law states that everything has an opposite. Light has to have dark in order to understand each. If we change an undesirable thought by concentrating on the opposite thought, brings a desirable change.

11) Law of Rhythm:

This Law describes to us that everything vibrates and moves to a rhythm. Each rhythm establishes seasons, cycles, stages of development, and patterns. Each cycle reflects the regularity of the universe. To master rhythm you must rise above any negative parts of a cycle.

12) Law of Gender:

This Law is the Yin (feminine) and Yang (masculine) of life, making them the basis for all creation. As spiritual beings we must balance the masculine and feminine energies within ourselves to become a true co-creator with God.
